

Congratulatory Speech

Ladies and Gentlemen, thank you for inviting me to the 30th anniversary ceremony.

I am Capt. Shoji Fukuda, Chief Executive Officer of KMSM K Marine Ship Management Pte. Ltd.

KMSM, based on the medium-term management plan of “K” Line have established ourselves as a functional strategy base to support business enhancement in the Asian region, which is positioned as one of the future growth markets.

We aim to provide high-quality and safe ship management services, establish a customer-oriented support system that is rooted in the region, and respond flexibly to diverse needs by strengthening the global functional strategy system of maritime organizations, personnel, and bases, including ship management companies.

Our Filipino crew, which we consider as our best partners, have acquired skills and knowledge thru the years with KLMAP, they have become indispensable human resources for the safety of the vessels we manage. KLMAP always delivers with its well-equipped facilities for safety, health and environmental trainings, as well as technical trainings with simulators and actual main engines.

We are one of the global maritime bases that support the activities of our business division in the Asian region from the front line. We will also work on decarbonization and DX technology introduction, KLMAP will be essential in instilling Kline safety culture and policies to the crew to ensure their understanding and cooperation to maintain safe operation as we introduce new technologies.

The shipbuilding industry is constantly being asked to respond to the need for safe operation, environmental issues, human well-being, and other aspects of the industry. SIRE 2.0, which everyone is aware of, will soon be applied to dangerous cargo vessels, and it is essential to respond to this new regulation.

We also expect that the introduction of new training and facilities that are in line with the times will further advance human resource development, and we pray for the further development of KLMAP in the future.

Congratulations KLMAP on the 30th anniversary of your founding ! !
